

Phase 1 Year

Student Portfolio

Name of Module: _____

Academic year: 2025-2026

Student's name: _____

Student ID: _____

Mentor's name: _____

Coordinator of Year — Portfolio:

Dr. _____

Department of: _____

Phone no.: _____

E-mail: _____

Introduction

Dear student,

This portfolio is evidence that you have mastered the required skills and achieved the objectives of

Year: 1st Module: 5th principles of disease It will be evaluated by a faculty

staff to review your performance and your final achievement in this course.

Definition of a portfolio:

A portfolio is a purposeful collection of student work that exhibits the student's efforts, progress, and achievements in one or more areas of study. The collection should include student participation in selecting content, evidence of achieving certain skills, evidence of student selfreflection, learning progress and plans for developing educational effectiveness.

Goals of using the portfolio:

1. Shows learning progress over time
2. Provides greater motivation for the students and faculty
3. Increases self-assessment skills are due to the student selection of the best samples of work
4. Encourages reflective learning as students are asked to comment on each portfolio entry
5. Increases tutor-student collaboration in the teaching-learning and assessment process
6. Achieves broader and comprehensive assessment of different domains (knowledge, skills and attitude).

Portfolio follow up and Mentoring:

- The student should be informed about the name of his/her portfolio **Mentor** immediately with the start of the course.
- The student should be ready for a follow up meeting with his/her mentor **twice / module**.
- During the meeting the student brings with him/her all portfolio partitions.
- The student will be ready for discussion and any kind of evaluation and feedback from his mentor during the meeting.

Student assessment of the portfolio: The student portfolio represents 20% of the total score of the module.

*Year ----- activities that are covered in the
portfolio*

- **Lectures**
- **Laboratory**
- **Problem based learning tutorial**
- **Clinical skills laboratory**
- **Students' presentation**

Part 1: Interactive lectures

Record the interactive lectures that have been taken place since you started the course. Indicate which date you have attended and confirm by initialing the box beside each:

[illegible]

Part 2: Practical sessions

Record the practical sessions that have been taken place since you started the course. Indicate which date you have attended and confirm by initialing the box beside each:

[illegible]

- *Kindly be noted that in order to pass this section you have to select and submit at least (-----) best representative evidences, one from each subject.*
- *Criteria of these evidences:*
 1. *These evidences can be in the form of (Drawings, specimen description or description of the learning experiences)*
 2. *These evidences should be representative for the practical sessions in the module.*
 3. *These evidences should be representative for all the course subjects (Histology & genetics, Anatomy, Pathology, Microbiology, Physiology, Parasitology, Biochemistry, Pharmacology)*
 4. *Each evidence should be evaluated and signed from the person who is responsible for the practical session.*

Part 3: Problem based learning Tutorial

Kindly be noted that in order to pass this section:

- 1. You have to present at least one problem in a debriefing session during the course. In this presentation you can use PowerPoint, videos and charts.**

Work as one of a group of 5 students in the same class to present the problem. (The tutor will evaluate you using the following evaluation form)

- 2. You must present one concept map for this course. (as the following example)**

S#	Phenomena identified

Concept Map

***To be collected and delivered to the module organizer after the first/second session by the group leader.**

***You can use the back-face if you need more space.**

S#	Phenomena identified

Student name					
Evaluator name					
Evaluation Criteria	1	2	3	4	5
	Poor	Fair	Good	Very good	Excellent
Valid selection of concepts					
Hierarchical arrangement of concepts					
Integration between concepts					
Relationship to the context of the problem					
Degree of student creativity					
Total score	/25				

- (1) Valid selection of concepts: the degree to which meaningful and valid concepts have been selected from the PBL problem.
- (2) Hierarchical arrangement of concepts: the degree of arrangement of concepts with more general concepts at the top and more specific below or extending outward.
- (3) Integration between concepts: the degree to which the map shows meaningful interconnections between the different concepts in the map.
- (4) Relationship to the context of the PBL problem: the degree to which the concepts are directly related and linked to the context of the problem. The context of the map is the clinical or community problem that the students study during the PBL week.
- (5) Degree of student creativity: the degree to which the student demonstrates unusual elements that aid communication or stimulate interest without being distracting.

Evaluation of PBL tutorial presentation

Tutor Evaluation of the PBL Process

Dear Sir:

This checklist is for evaluation of the performance of the presenting students in PBL sessions. It is composed of two parts for the first (& second) and final sessions. Please fill it out during the appropriate session, so that we can identify defects in students approach to the process and apply a corrective action if necessary.

You may add whatever you feel important and/or explain any of the opinions you have given in the checklist in the comment-slot and may also use the other face of the sheet.

Mark the appropriate box, where:

1=Verydefective

2=Defective

3 = Average

4 = Good

5 = Excellent

#	Item	1	2	3	4	5
Preliminary discussion: Jumps from 1-5						
A	Clarify the terms of the problem:					
B	Define the problem					
C	Analyze and brainstorm about the problem					
D	Generation of hypotheses					
F	Testing hypotheses					
G	Prioritize hypotheses					
H	Draw concept map					
I	List learning issues					
Wrap-up Session: Jump 7						
J	Contribute to the discussion					
K	Discuss information found					
L	Express knowledge of the information					
M	Relate to learning objectives and problem					
N	Support discussion with diagrams and/or examples					
O	Cite references					
P	Evaluate one another's new knowledge

Part 4: Clinical Skills (Clinical Skills Laboratory)

The following is a list of skills that will have been recently introduced through the course. How confident do you feel with each?

Clinical Skills (Items to be examined)	Did you Practice?		How confident do you feel with 'each? (Write No: 1 lowest -5 highest)				
	Yes	No	1	2	3	4	5
1.							
2.							
3.							
4.							
5.							

- **Kindly be noted that in order to pass this section you have to master all these skills.**
- **You are requested to select at least 1 skill and perform them in front of your tutor using the attached checklists.**

Part 5: Student Seminar

Checklist for Evaluation of Students' Presentations

Seminar Title:

For the evaluator: *please check each item separately out of 10 marks. Don't cancel any one item.*

Item	Score Out of 10 (A)	<i>Relative weight of the item</i> (B)	Calculated Score (A*B)
-Student introduces seminar topic		0.05	
way of presentation (clear communication,A.V. aides,sequencing,organization.....		0.10	
Scientific content		0.40	
-Student encourages discussion		0.10	
-Responds to questions		0.10	
-Cooperation between students to achieve seminar objectives		0.20	
-Makes summary.....		0.05	
Total score			/10

Part 6: Reflection

Reflection is very important to deepen your learning and to be a life-long learner. In reflection you use critical thinking to analyze the educational situation and learn from it, and then you will try out what you have learned to have an experience. The benefit of this part of your portfolio is to encourage you to reflect on what you are doing, what you are finding difficult and what you are trying to plan for.

Write a situation (s) that was (were) happened during the course. The following elements should be covered in your reflection:

Description: what was happened in your experience?

- What I tried to learn?
- What were the most important things I learnt?
- What I need to work on next time? What are my strengths and weaknesses?
- How will my learning influence/change practice?

Part 6: Personal learning plan

In this plan you identify your learning need, why you need it, how you will learn, how you will know that you learned, its time frame, and your future learning.

[illegible]

Part 7: Mentor meetings

**Use the following record for each mentor meeting
(1st Mentor MEETING-2nd Mentor MEETING)**

Record of Meeting

Student Details

Meeting took place on: ----- Student

Full Name: -----.

Student signature: -----

Date-----

Personal Mentor Details

Personal Tutor Name: -----

Tutors signature: -----

Date-----

Please confirm that this mentor meeting has taken place by asking your mentor to sign and date as above.

Thank you

Portfolio scoring

This table will be filled by your mentor after evaluating the whole portfolio.

Section	Score	Remarks
PBL tutorial presentation	/25	
Concept map	/25	
Clinical skills checklist (skill lab)	/20	
Evidences for the practical sessions	/90	
Student's presentation	/25*	
Reflection and learning plan	/25	
Organization of the whole portfolio	/50	
Student attitude	/40	
Total score	/300	

*If student's presentation was not applicable for this module please count the total from 275
